

i2SPC.com your QA/QC Web-Portal

Increase QA/QC Productivity
Reduces Risk
Supports Dock to Stock
Suppliers Monitor & Validate Quality

➤ OEMs and Sub-Tier Manufacturers - Boost Quality & Productivity!

www.i2SPC.com is a **web-based Quality Portal** providing the automated review and analysis of supplier, and/or in-house inspection data prior to shipment, often called "Dock-Audits". The portal immediately rejects non-conforming data, and alerts users of unfavorable trends, or potentially high defect rates. Once verified, all inspection data is archived along with quality documents such as Certificates of Compliance, Lab Reports etc.. In addition, customers may wish to upload various quality documents for secure on-line access by their suppliers. These documents are referenced on every inspection report, giving each supplier a clear indication of your requirements. The portal also supports new product introduction (NPI) through a Production Part Approval Process (PPAP) module.

Functional diagram

➤ Key Features - Benefits

- Web Based Cloud Application – Startup is Quick
- Supports **Piece Parts, Assemblies** and **Bulk Commodities** – Offers Flexibility
- Reduces Receiving Inspection Labor
- Automatically Accepts or Rejects a Shipment before Leaving Supplier's Dock
- Import, Validate, Share and Archive Inspection Data and Quality Documents
- Tracks Process Capability (Cpk, Cp, Ppk, Sigma, Mean & Range)
- Alerts when Trends are Unfavorable
- Drives PPM Defective Awareness - Includes Supplier Scorecards
- Our system eliminates typical errors (blank entries, typos, wrong revision)
- Tracks parts by Date Code, Lot Number or Serial Number – Easily Searchable
- No need for a third party statistics program
- Secure Socket Layer (SSL) plus 128 Bit Encryption keeps your data secure!
- Visit www.i2SPC.com to learn more

Continuous Improvement & Lean

➤ How do I get started?

1. Let us give you a personal online tour. (This only takes about 20 minutes.)
2. Try the software for FREE! Pick one or two suppliers and try a few shipments.
 - We will setup the system for you.
 - We will supply training material for your suppliers.
3. Choose a platform:
 - a. Software as a Service (SaaS) using www.i2SPC.com . By choosing SaaS you have no software to buy or install. It's the most cost effective, and yields the fastest implementation.
 - b. Licensed Software. A traditional approach for those who want to manage the hardware and software themselves. Also allows customization of software to meet your exact needs!
