

## Press Release

*October 26, 2009 for Immediate Release*

GAF Materials Corporation selects [www.i2SPC.com](http://www.i2SPC.com) as its new supply chain quality portal.

Bristol, Connecticut – Data Vine, LLC. announced that GAF Material Corporation has completed a successful trial of the [www.i2SPC.com](http://www.i2SPC.com) web-based supply chain portal. The system was tested with two suppliers and found to meet the following needs: Automated review and analysis of supplier inspection data prior to shipment, Immediate rejection of non-conforming data, Trend analysis, Automated alerts of unfavorable trends or potentially high defect rates, Storage of quality documents such as Certificates of Compliance, and Supplier Scorecards. GAF Material Corp. is now in the process of deploying the program throughout its supply chain.

**www.i2SPC.com provides a secure website** allowing OEMs and suppliers to import, validate, share, and distribute **inspection data and quality documents** throughout their supply chain.
